## DETAILED ACTION

(1)

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 9, 2011, has been entered.

Applicant amended claims 12 and 13. No new matter has been entered. Claims 12-19 are pending before the Office for review.

(2)

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

With respect to **claims 12 and 13**, Applicant's amendment overcomes the rejection of the claims under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. MPEP Sec. 2172.01. The claimed invention now includes the polymer composition that is essential for achieving the feature that an area of colloidal silica exposed at a coating surface occupies 70% or more of the coating surface.

Additionally, claims 12 and 13, as amended, are now commensurate in scope with the unexpected results alleged by Applicant. The unexpected results are apparent

Art Unit: 1728

based on an analysis of Additional Comparative Examples 1 and 2 (Affidavit filed November 12, 2010) and Example 2 (Specification, Table 2). Specifically, both Additional Comparative Examples 1 and 2 and Example 2 contain a polymer composition that is within the scope of the claimed invention. SZ-6030 is representative of the methyl siloxane and the Specification makes clear that siloxanes are substitutable for one another and that dimethyl siloxanes can be used within Polymer I. Paragraph 48. Both Additional Comparative Examples 1 and 2 and Example 2 use the same amount of colloidal silica and a nonionic surfactant that has the required number of repetitive polyoxyethylene units. Affidavit, Table 1 and Specification, Table 2. Additional Comparative Examples 1 and 2 use anionic surfactants that are not within the scope of the claimed anionic surfactant and lead to coating compositions wherein the occupied areas of colloidal silica at the coating surface are 25% and 22%, respectively. Affidavit, Table 2. Example 2 uses an anionic surfactant within the scope of the claimed invention and has an occupied area of colloidal silica at the coating surface of 82%. Specification, Table 4.

Accordingly, Applicant is able to overcome the art of record by establishing the superiority of occupied areas of colloidal silica of the claimed compositions compared to the prior art compositions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
